SUMMARY

Software Developer skilled in FastAPI, Django, React, and LangGraph, focused on building scalable full-stack applications and AI automation solutions. Experienced in designing REST APIs, backend architectures, and intelligent workflows that improve efficiency and user experience.

PERSONAL PROJECTS

AI-Mini Digital-Ads Agency

- Developed an end-to-end AI digital ads automation platform using FastAPI, React, and LangGraph where an ML image-captioning model converts uploaded product images into captions to trigger an automated ad-generation workflow.
- Built a multi-agent pipeline including keyword extraction, LLM-based ad writer for headlines/descriptions, and a compliance-checking agent to ensure policy-safe, targeted, and high-quality advertising content.
- Implemented scalable backend APIs and an automated publisher agent that processes validated outputs and prepares ads for posting, simulating a real-world SaaS marketing automation system for small businesses.

AI-Whatsapp Chatbot Agent

- Developed an AI WhatsApp chatbot with a dashboard to add, update, and delete custom queries.
- Synced backend APIs with the bot to deliver AI-responses based on stored queries.
- Automated customer interactions to ensure consistent replies and reduce manual support effort.

FINAL YEAR PROJECT

AI-Powered Teacher Assistant

- Developed Profease AI, an AI-powered teaching assistant for professors to automate semester-long lecture content and quizzes.
- Designed a dashboard system enabling course creation, class management, and assignment of multiple courses to different classes.
- Implemented AI-driven lecture and quiz generation using OpenAI SDK, producing university-level content tailored to credit hours.
- Built secure student quiz portals with auto-generated links, result tracking, and filtering by name/roll number.
- Integrated React frontend + FastAPI backend + MySQL database for a scalable SaaS solution with real-time course and quiz management.
